

## Claims

- [c1] 1. An adaptor, having video/audio player functionality, comprising:
  - a data storage device, without video/audio player functionality,
  - an encoder/decoder device, for encoding/decoding said video/audio data, said encoder/decoder device is connected to an USB port adapted for connecting to said data storage device, wherein said encoder/decoder device decodes said video/audio data stored in said data storage device so that the decoded video/audio data can be played via video/audio device connected to said encoder/decoder device via said USB port.
- [c2] 2. The adaptor according claim 1, wherein said encoder/decoder device is further connected to a microphone.
- [c3] 3. The adaptor according claim 1, wherein said video/audio device is a monitor.
- [c4] 4. The adaptor according claim 1, wherein said video/audio device is an earphone.
- [c5] 5. The adaptor according claim 1, wherein said video/audio device is a speaker.

- [c6] 6.The adaptor according claim 1, wherein said USB port can be a USB port.
- [c7] 7.The adaptor according claim 1, wherein said USB port is an IEEE1394 port.
- [c8] 8.The adaptor according claim 1, wherein said data storage device is a portable disk.
- [c9] 9.The adaptor according claim 1, wherein said data storage device is a memory card.
- [c10] 10.The adaptor according claim 1, wherein said data storage device is a hard disk.
